

# FLUIDTROL FPT QUAD

PROCESS TECHNOLOGIES, INC.

Fluidtrol's stacked filter systems are ideal for applications with higher filter area requirements and minimal floor space. The internally reinforced bands provide maximum strength for stacking. Fluidtrol's fully customizable pipe kit options in manual, linked, and automated actuation allow the end-user the ability to utilize our most-efficient in the industry sand filters in the set-up that best suits their equipment room.

Item	Part Number	Material	Description
